

Sergey Grigorash, AI-Driven Full-stack Software Engineer

Samarqand, Uzbekistan, +998 90 391 29 97, sergey.adviser@gmail.com, @Otec_S

LINKS sergeygrigorash.com

PROFILE Full-stack TypeScript/Node.js developer with a strong focus on AI-augmented software development (Cursor, Claude Code, Copilot). Passionate about building scalable applications and using AI tools to improve development speed, code quality, and overall engineering efficiency.

Actively fosters an AI-driven culture within the team by leading webinars and providing 1-on-1 mentoring.

EMPLOYMENT HISTORY

- Jul 2025 — Present **Software Engineer - EPAM Systems**
- Designed and implemented custom AI skills, MCP servers and subagents that automated repetitive and time-intensive tasks, enabling faster delivery and reducing manual effort for client teams.
 - Built a multilingual headless CMS platform that empowered content teams to manage pages, events, and publishing workflows without developer involvement (<https://amcham.me>).
 - Delivered scalable web applications for enterprise clients across oil & gas and business domains.
- Tech stack: AI, TypeScript, React, Node.js, Next.js, Payload CMS, TanStack, Tailwind, SCSS.**
- Jan 2025 — Jul 2025 **Full-stack Developer - Rocket Tech School**
- Developed and maintained a multilingual educational platform serving an international online programming school for children and teenagers (<https://www.rts.school>).
 - Built and extended a custom UI Kit based on Ant Design, improving consistency and accelerating frontend development.
 - Developed responsive user interfaces and integrated backend functionality using NestJS.
- Tech stack: TypeScript, React, RTK Query, Next.js, NestJS, WebRTC, Ant Design.**
- Jan 2024 — Jan 2025 **Frontend Developer, Vilisov company**
- EasyQR (<https://easyqr.online>) is an electronic menu system for HoReCa. I implemented frontend enhancements: refactored code, custom hooks, and i18n.
 - EasyAnalytics parses daily data from the Uzum marketplace (<https://uzum.uz>), aiding clients with analytics. I implemented dual-currency tables, charts, notifications, and sales analytics. The project is on hold.
- Tech stack: TypeScript, React, Redux, Ant Design, Recharts, i18next.**
- Mar 2023 — Dec 2023 **Frontend Developer, EDUSENSE**
- Contributed to the development of a subscription-based analytics platform integrated with eMaktab (<https://emaktab.uz>), providing detailed insights into student performance and learning progress.
- Tech stack: React, JavaScript, Jest, Express.js, MongoDB, Nginx.**

Jan 2021 — Feb 2023

Web Developer, **Legal Firm Adviser Ltd.**

Developed and maintained the corporate website <https://adviser-spb.ru> implemented SEO optimization strategies that increased organic traffic.

Tech stack: **HTML, CSS, BEM.**
